Abandoned . . . again! Waggit misses the team of dogs who live in Central Park—his real family. He should have listened to them and never trusted the human. Now she's brought him to a faraway place and left him there. But Waggit is determined to find his way back home and nothing is going to stop him . . . not chains, not cruel enemies, not anything. When Waggit comes face-to-face with a very unusual human and an unlikely ally, he must decide if he can trust his instincts and his heart one more time. The long journey may lead him to the park, but what if it isn't home anymore? In this sequel to Waggit's Tale, Peter Howe continues the exciting story of a young dog who finds what he needs to survive in the most unexpected places.

Predict the future more accurately in today's difficult trading times The Holy Grail of trading is knowing what the markets will do next. Technical analysis is the art of predicting the market based on tested systems. Some systems work well when markets are "trending," and some work well when they are "cycling," going neither up nor down, but sideways. In Trading with Signal Analysis, noted technical analyst John Ehlers applies his engineering expertise to develop techniques that predict the future more accurately in these times that are otherwise so difficult to trade. Since cycles and trends exist in every time horizon, these methods are useful even in the strongest bull--or bear--market. John F. Ehlers (Goleta, CA) speaks internationally on the subject of cycles in the market and has expanded the scope of his contributions to technical analysis through the application of scientific digital signal processing techniques.
