"The law of persons is a dynamic area of the law, and it is this dynamic nature that generates interest in this subject and makes it stimulating to teach and learn. Law of Persons seeks to make this subject area accessible to students, including first-year students. In the law of persons, the common law and legislation have been harmonised with the spirit, purport and objects of the Bill of Rights, while the values entrenched in the Constitution are permeating every area of the law. The greatest change in our law of persons to date has been the Children's Act 38 of 2005: it had redefined basic concepts, it has revolutionised the parent-child relationship, it has ended the labelling of children in terms of their parents' marital status and it has radically altered the legal status of unmarried fathers. Law of Persons is also available in Afrikaans, and should ideally be used in conjunction with *Personeeregbronnebundeel / Law of Persons Sourcebook*"--Provided by publisher.

This practical text introduces students to all the principal data collection methods and data analyses used in social psychology. A student-friendly introduction to the data collection methods and data analyses used in social psychology. Describes the principal research methods and shows how they can be applied to particular research questions. Each chapter is written by a psychologist well known for using the method they describe. Methods presented include conducting surveys, constructing questionnaires, facilitating focus groups, running interviews, and using archival recordings. Topics used to illustrate these methods include identity processes, attribution, stereotyping, attitude change, social influence, communication, and group dynamics. Includes step-by-step exercises for students and notes for course leaders.

This book introduces the most significant studies and practices developed by scholars and researchers in school psychology in Brazil. The chapters discuss a critical, historical and cultural perspective of how psychology as a science and psychologists as professionals are able to contribute with schooling and education. Its goal is to provide an overview about the main discussions of school psychology in Brazil for an international audience, without losing the necessary depth to present delicate and important topics. Models of psychology based on natural sciences and traditional practices are criticised for concealing a wide array of causes for school failure, related to poverty, educational culture, class oppression and low budget for public education. Marxist perspectives, Foucaultian analysis and psychoanalysis help to provide psychologists with theoretical bases for practices of school psychology in different contexts. Experiences of criticism of public policies, as well as an understanding of the psychologist as part of social movements and policy making are briefly addressed. These features become Psychology, Society and Education: Critical Perspectives in Brazil, a unique publication in its gender. From the point of view of teaching and researching in the fields of psychology, education and social sciences, this volume stands out by presenting theoretical and methodological contributions to qualitative approaches. This book will also be useful to international scholars and researchers interested in expanding knowledge of Brazilian society through education.

With a full explanation on the basic principles of marketing, this guidebook helps readers answer such questions as What is marketing? What is a marketing forecast? and What is the best way to conduct market research? Aimed at scientists and non-specialised readers alike, this book retraces the source of national and international biotechnology programmes by examining the origins of biotechnology and its political and economic interpretation by large nations. With a foreword by Andr(r) Goffeau, who initiated the European Yeast Genome Project, the book describes the achievements of the first genetic and physical maps, as well as the political and scientific genesis of the American Human Genome Project. Following these advances, the author discusses the European biotechnology strategy, the birth and implementation of European biotechnology programmes and the yeast genome project.

The only introductory economics text to equip students to address today's pressing problems by mastering the conceptual and quantitative tools of contemporary economics. OUP has partnered with the international collaborative project of CORE researchers and teachers to bring students a book and learning system that complements and enhances CORE's open-access online e-book.The Economy is a new approach that integrates recent developments in economics including contract theory, strategic interaction, behavioural economics and financial instability. It challenges students to address inequality, climate change, economic instability, wealth creation and innovation and other problems. It has been adopted as the standard principles course at University College London, Sciences Po Paris and the Toulouse School of Economics.A new economics for the principles course The Economy begins with social interactions using elementary game theory and institutions modelled as rules of the game. This provides the basis for a modern treatment of markets including price-making as well as price-taking, the exercise of power, and the importance of social norms and adjustment to disequilibria. Introducing labour and credit markets with incomplete contracts allows a consistent treatment of aggregate employment and fluctuations without the need for ad hoc sticky price and wage assumptions. Banks create money by extending credit and a central bank seeks to implement a target inflation rate. Growth and instability are illustrated from the Great Depression, through the post-war golden age of capitalism through to the financial crisis and ensuing uncertainties. Students acquire an understanding of the past and current evolution of the economy in its social and environmental context, equipping them to marshal evidence and articulate positions about contemporary policy issues.

Esi decides to divorce after enduring yet another morning's marital rape. Though her friends and family remain baffled by her decision (after all, he doesn't beat her!), Esi holds fast. When she falls in love with a married man wealthy, and able to arrange a polygamous marriage the modern woman finds herself trapped in a new set of problems. Witty and compelling, Aidoo's novel, "inaugurates a new realist style in African literature."

Corporate citizenship is a prominent international issue as contemporary corporations are no longer expected to perform financially, but are also expected to have an ethical relationship of responsibility between the corporate itself and the society in which it operates and performs its business activities. Provides an up-to-date theoretical content pertaining to corporate citizenship, providing local and global examples and case studies.
