Somali Grammar Revision is intended for the intermediate or advanced level learners of Somali language. It covers the eleven Somali grammatical categories. The verb and the adjective, 20% of Somali grammatical categories, constitute more than 80% of written and spoken Somali because use of tenses affects both grammatical categories. Somali Grammar Revision: · highlights differences in usage of many aspects of written and spoken Somali · introduces variant past tense and key sentence structures used in spoken Somali · discusses correct answers to what and who-questions · contains verb, adjective, preposition and noun tables · discusses verb-related structures and a variant imperative structure · introduces type 3 potential sentences · addresses how to deal with tense-related ambiguity in negative and negative interrogative sentences. · addresses how to use the reflexive word 'is' with verbs and pronouns

Somali is spoken by more than nine million people in the Horn of Africa and by expatriate communities in the Middle East, Europe and North America. It is the official language of Somalia and an important regional language in Ethiopia and Kenya. As a Cushitic language Somali is part of the great Afroasiatic language family whose other branches include Semitic, Berber, Chadic and Ancient Egyptian. This book provides a comprehensive description of the grammar of the language that will be of interest to non-specialists and linguists interested in typology and language comparison. The author's accessible investigation of the phonology, morphology, syntax and discourse structure allows the reader a clear view of the linguistic character of Somali and, through Somali, of a Cushitic language. A further important feature of the book is its use of authentic data from a range of sources, including prose, poetry and proverbs.
