Kurose and Ross manage to

convey the principles of

computer networking (often

considered "dry" material)

in a technically precise yet

entertaining way. A good

measure of humorous bits and

off-the-cuff remarks are

sprinkled throughout the

text, making the reading fun

(students love it).

This can be done in simulated scenarios or in a "real" network environment such as the Internet. The Java applets in the textbook Web site take the first approach. In these Wireshark labs, we'll take the latter approach. You'll be running various network applications in different scenarios using a computer on your desk, at home, or in a lab.
