Mader's "Concepts of Biology" was developed to fill this void. Organised around the main themes of biology, "Concepts of Biology" guides students to think conceptually about biology and the world around them. Just as the levels of biological organisation flow from one level to the next, themes and topics in "Concepts of Biology" are tied to one another throughout the chapter, and between the chapters and parts.

Since energy has predict- able properties, all organisms have similar ways of handling it. There are five forms of energy, and each can be either kinetic or potential: (1) mechanical, (2) nuclear, (3) electrical, (4) radiant, and (5) chemical. All organisms interact in some way with these forms of energy.
