This classic series will excite students' imaginations while enriching skills in logical thinking. Logic Countdown problems are easy to incorporate into lesson plans and are formatted to enhance the fullest spectrum of curriculum areas while sharpening thinking skills. Challenging and instructional, these thought-provoking books present sequential exercises in logical reasoning that include relationships, analogies, syllogisms, sequences, deductive reasoning, inference, truth-values, and logical notation. Simple grids coupled with intriguing problems evoke enthusiasm and inspire students to higher and higher levels of thinking. Each book builds on concepts presented previously in the series to offer a comprehensive logic adventure for young thinkers. The skills students build by using this book are applicable to several areas of

the curriculum. Academic skills used for reading, math, writing, and science all depend on the ability to perceive and define relationships and to form inferences. But, beyond the academic world, students will find logical thinking an integral part of everyday life. This is the first in a three-book series designed to sharpen children's logical thinking skills. Once students master the skills presented in this book, they will be ready for new challenges in *Logic Liftoff* and *Orbiting with Logic*. Grades 3-4

procedures to PreK to ensure a solid foundation and seamless transition from grade level to grade level. The series is organized around the new NCTM Focal Points and is designed to meet most state standards. Math Connects focuses on three key areas of vocabulary to build mathematical literacy, intervention options aligned to Rtl, and a comprehensive assessment system of diagnostic, formative, and summative assessments.

Technology is taking over all aspects of life. Yet studies have shown that up to one half the population is 'technophobic'. This means having negative opinions or being anxious about information technology like personal computers. This book examines the origins of technophobia - what it is, who has it and what causes it. The impact of

gender is examined and the social and cognitive psychological factors underlying technophobia are reviewed and combined into an overall psychological model.

Techniques for reducing technophobia are discussed, and the effect of technophobia on everyone from school children to teenagers is analysed. Technophobia will be useful both for academic study of the area, and for those devising IT policy in schools, business and government.
