This document is written for educational purposes, for project managers who need to write a document with all agreements between the Project Board and the Project Manager. The PID, or Project Initiation Documentation is made during the Initiation Stage of a project, before actual design, development and delivery is being done. The document is one of the main documents in the PRINCE2® method and is comparable to the Project Charter or Project Definition Document.

Practical, authoritative, and the first comprehensive guide tomanaging every phase of your publication project. The only bookdevoted exclusively to technical publication project management,Managing Your Documentation Projects arms you with provenstrategies and techniques for producing high-quality, extremelyusable documentation, while cutting cost and time-to-market. Dr.JoAnn T. Hackos, a top documentation design and project managementconsultant to major corporations, including IBM andHewlett-Packard, shares with you the fruit of her more than 15years of experience in the field. She gives you: * Clear-cut, rational guidelines to managing every phase of theproject from planning and development, through production,distribution, and project evaluation * Scores of usable templates, checklists, summaries, andforms * Dozens of real-life case studies and scenarios taken from theauthor's extensive experience at top corporations * Techniques applicable to virtually all fields ofdocumentation Managing Your Documentation Projects was designed to function as acomprehensive guide for new managers and a daily tool of survivalfor veterans. It is also an invaluable resource for technicalwriters, editors, graphic designers, consultants, and anyone calledupon to produce high-quality technical documentation on time andwithin budget. JOANN T. HACKOS, PhD, is President of ComtechServices, Inc., an information/design firm in Denver, Colorado andSan Jose, California. She is also president of JoAnn Hackos &Associates, Inc., a strategic planning and management consultingfirm. In 1993, she served as president of the Society for TechnicalCommunication (STC) and is a frequent conference keynote speaker onsuch topics as quality and usability of products and services, theimportance of meeting the needs of the customer, and projectmanagement.

Written on the back of first-hand experience this book provides a solid framework for managing e-business projects. The book is primarily intended for current and prospective e-business project managers who wish to share ideas, experiences, and best practices. Recent market surveys indicate that many e-business projects fail due to project mismanagement. Various project management techniques from the IT sector can be successfully applied to e-business projects. This book shows which ones whilst also providing information on new techniques for situations that are unique. Based on real-world experience, 99 key success factors are discussed preparing the reader to manage e-business projects on time, on budget and to the satisfaction of clients.

On behalf of the PROFES Organizing Committee we are proud to present the proce- th ings of the 11 International Conference on Product-Focused Software Process Improvement (PROFES 2010), held in Limerick, Ireland. Since the first conference in 1999 the conference has established its place in the software engineering community as a respected conference that brings together participants from academia and industry. The roots of PROFES are in professional software process improvement motivated by product and service quality needs. The conference addresses both the solutions found in practice as well as relevant research results from academia. To ensure that PROFES retains its high quality and focus on the most relevant research issues, the conference has actively maintained close collaboration with industry and subsequently widened its scope to the research areas of collaborative and agile software devel- ment. The main themes of this year's conference were “Agile and Lean Processes” and “Engineering Service-Oriented Systems. ” These two main themes enabled us to cover the contemporary software devel- ment demands and trends in a comprehensive manner and to tackle the most important current challenges identified by the software industry and software research com- nity—namely, the shift of focus from "products" to "services. " The technical program featured invited talks, research papers, and experience reports on the most relevant topics related to processes for developing software-intensive services and products. In addition, a number of workshops and tutorials were hosted.

LNCS volumes 2073 and 2074 contain the proceedings of the International Conference on Computational Science, ICCS 2001, held in San Francisco, California, May 27-31, 2001. The two volumes consist of more than 230 contributed and invited papers that reflect the aims of the conference to bring together researchers and scientists from mathematics and computer science as basic computing disciplines, researchers from various application areas who are pioneering advanced application of computational methods to sciences such as physics, chemistry, life sciences, and engineering, arts and humanitarian fields, along with software developers and vendors, to discuss problems and solutions in the area, to identify new issues, and to shape future directions for research, as well as to help industrial users apply various advanced computational techniques.

Reconstruction and Restoration of Architectural Heritage 2021 presents contributions on various aspects of the study, protection and restoration of architectural monuments and on the reconstruction of major historical urban development sites. Moreover, various complex and problematic aspects of engineering reconstruction of monuments are discussed. A wide range of issues is considered in the process of preserving historical heritage, including: the historical formation of buildings, construction and territories; the conservation, reconstruction and restoration of buildings and constructions; the transformation of historical spaces and areas. parallels and features in the development of urban planning, architecture and construction art in Russia and Spain the fate and work of Augustine Augustinovich Betancourt This collection of papers combines contributions about the history and restoration of many of the largest nature reserves, estates, cities and monuments. It is intended for academics and professionals involved in the history and restoration of nature reserves, estates, cities and monuments.

Case Studies in Knowledge Management provides rich, case-based lessons learned from several examples of actual applications of knowledge management in a variety of organizational and global settings. A variety of KM issues are explored, including issues associated with building a KMS, organizational culture and its effect on knowledge capture, sharing, re-use, strategy, and implementation of KM initiatives and a KMS. The benefit of focusing on case and action research is that this research provides an extensive and in-depth background and analysis on the subjects, providing readers with greater insight into the issues discussed.

This book is dedicated to applied gamification in the areas of education and business, while also covering pitfalls to avoid and guidelines needed to successfully implement for a project. Using different theoretical backgrounds from various areas including behavioral economics, game theory, and complex adaptive systems, the contributors aim to help readers avoid common problems and difficulties that they could face with poor implementation. The book’s contributors are scholars and academics from the many areas where the key theory of gamification typically comes from. Ultimately, the book’s goal is to help bring together the theories from these different disciplines to the field of practice in education and business. The book is divided into four parts: Theory, Education, Business, and Use Cases. Part I provides a foundation on the theory of gamification and offers insight into some of the outstanding questions that have yet to be addressed. In Part II, the application and value that gamification can bring within the education sector is examined. The book then changes focus in Part III to spotlight the use of gamification within business environments. The topics also cover educational aspects like improved learning outcomes, motivation, and learning retention at the workplace. Finally Part IV concentrates on the applications and use of gamification through a series of case studies and key elements that are used in real situations to drive real results.
