Before Dawn He cried so loud. He cried so sad. During his birth, his mother almost lost her life trying to save his. There were so many complications that some people said he would have been better off if he had been still born, rather than to have lived. He was an ugly baby. He cried a lot when strangers held him. They outwardly scorned him, and they secretly abused him. A big brown medicine ball worn over his bulging naval caused him to be cut off from his little friends much of the time. He grew up in a kind, loving, and faithful sharecropper family. But he saw suffering in his family early. When he was just six years old, his family was thrust out of their home and cast into the wilderness. This happened because his parents tried to make progress. They tried to buy some land and break the sharecroppers curse from the family. The wilderness living experience was tough. His mother's faithful prayers helped the family to cope; the barren land, the creeks, the woods, the wild animals, the things that crawled the earth. Meeting miss Dolly, a scary but sad woman, and seeing his brother dangling over fast moving water after falling off the foot log were terrifying experiences for him. Could he pull himself up by his bootstraps? Well, he started a self-assessment program in seventh grade. He left home at age sixteen hitch hiking, down a long, lonely, dangerous highway. He was searching for a schoolhouse.

There has been an assault on conservative based values by the liberal left; this situation has only been exacerbated by moderate Republicans who have in some cases refused to take a stand. Even the Republican leadership has been timid in engaging the left and holding firm to their moral high ground. Common Sense Conservatism is the antidote for all that troubles our great nation. We must allow Common Sense to dictate our actions if we ever hope to save our way of life from those who wish to destroy America and transform it into a second rate power. What is it in a person's life that sets forth a conservative outlook? Here William Edward Skokos allows us a peak into his experiences for the key to that conservatism. He takes on the policies of both the left and the right as he provides a provocative and well informed explanation of the origins of these policies and what needs to be done in order to turn the tide and revitalize America. His belief and faith in the American people is the key element which he believes will ensure the continuation of the American dream.
