Timing

FE engines use a timing assembly very similar to other Ford engines, with the aforementioned cam thrust plate, an offset positioned dowel pin for locating, and a single central cam bolt for retention. The factory cam sprockets were often aluminum with molded nylon teeth for quieter operation.

What works best?

Depends upon the engine and what works best for you. There are no one size fits all timing solutions. But a generally stock-headed FE will like around 38 degrees total timing. You generally don't have to worry too much about initial timing over 12 degrees.

Ignition timing - 332-428
Ford FE Engine Forum
2018-03-30T15:59. Just
for the initial start, you'd
look for 10-14 degrees
initial. You shouldn't be
concerned with total
timing at this point.

What the engine wants
once you are ready for
tuning really depends on
a very long list of
variables and no one can

get you to the sweet spot
over the distance of the
Internet.

Timing - 332-428 Ford
FE Engine Forum

I usually run anywhere
between 14-18 initial
depending on the
combination. What's
more important is how
much advance you run
and where it comes in at.
The distributor starts

Acces PDF Fe Engine Timing

advancing somewhat early anyway, so you never really stay at initial timing except at idle or just right above idle.

390 Timing - 332-428
Ford FE Engine Forum
The 3RZ FE engine has a timing chain, which drives the intake camshaft only. The intake camshaft rotates the exhaust camshaft by a

Acces PDF Fe Engine Timing

scissors gear. Camshaft specifications: intake duration - 230 degrees; exhaust duration - 224 degrees. The engine has a hydraulic timing chain tensioner and oil jet to lubricate the chain.
