Cut & Stitch collects together some of the in-betweens and afterthoughts of Petrol Girls' latest record of the same name, from the perspective of lead vocalist and lyricist, Ren Aldridge. In a similar process to speaking between songs on stage, Aldridge develops and contextualises the ideas and lyrics on the record, writing in and out of them, and making links between them. Through a series of mini-essays, she explores cutting and stitching as a way of thinking about topics such as community, the environment, building solidarity, resisting perfectionism, emotional labour, gender and craft.

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.
