Contributions to Probability: A Collection of Papers Dedicated to Eugene Lukacs is a collection of papers that reflect Professor Eugene Lukacs' broad range of research interests. This text celebrates the 75th birthday of Eugene Lukacs, mathematician, teacher, and research worker in probability and mathematical statistics. This book is organized into two parts encompassing 23 chapters. Part I consists of papers in probability theory, limit theorems, and stochastic processes. This part also deals with the continuation and arithmetic of distribution functions, the arc sine law, Fourier transform methods, and nondifferentiability of the Wiener sheet. Part II includes papers in information and statistical theories. This book will prove useful to statisticians, mathematicians, and advance mathematics students.

Assessment is not only a measure of student learning, but a means to student learning. This bestselling book guides you in constructing and using your own classroom assessments, including tests, quizzes, essays, and rubrics to improve student achievement. You will learn how to weave together curriculum, instruction, and learning to make assessment a more natural, useful part of teaching. Find out how to... ensure your assessments are fair, reliable, and valid; construct assessments that meet the level of cognitive demand expected of students; create select-response items and understand technology-enhanced items that are increasingly being used on assessments; use constructed-response items and develop scoring criteria such as rubrics; and analyze student results on assessments and use feedback more effectively. This second edition features updated examples that reflect the Common Core State Standards as well as other content standards and new, useful samples of teacher-friendly techniques for strengthening classroom assessment practices. No matter what grade level or subject area you teach, this practical book will become your go-to resource for designing effective assessments.

Results from national and international assessments indicate that school children in the United States are not learning mathematics well enough. Many students cannot correctly apply computational algorithms to solve problems. Their understanding and use of decimals and fractions are especially weak. Indeed, helping all children succeed in mathematics is an imperative national goal. However, for our youth to succeed, we need to change how we'll're teaching this discipline. Helping Children Learn Mathematics provides comprehensive and reliable information that will guide efforts to improve school mathematics from pre-kindergarten through eighth grade. The authors explain the five strands of mathematical proficiency and discuss the major changes that need to be made in mathematics instruction, instructional materials, assessments, teacher education, and the broader educational system and answers some of the frequently asked questions when it comes to mathematics instruction. The book concludes by providing recommended actions for parents and caregivers, teachers, administrators, and policy makers, stressing the importance that everyone work together to ensure a mathematically literate society.

This US report from the International Reading Association looks at standards for middle and high school literacy coaches. The standards are organised into two parts - leadership standards and content area literacy standards. Table of contents: * Introduction * Part 1: Leadership standards * Part 2: Content area literacy standards (english language arts, mathematics, science, social studies) * Part 3: What we know and what we need to know about literacy coaches in middle and high schools: a research synthesis and proposed research agenda * References.

"In Artful Sentences: Syntax as Style, Virginia Tufte shows how standard sentence patterns and forms contribute to meaning and art in more than a thousand wonderful sentences from the twentieth and twenty-first centuries. The book has special interest for aspiring writers, students of literature and language, and anyone who finds joy in reading and writing."--Publisher's description.
