Shetty grew up in a family where you

could become one of three things—a doctor, a lawyer, or a failure. His family was convinced he had chosen option three: instead of attending his college graduation ceremony, he headed to India to become a monk, to meditate every day for four to eight hours, and devote his life to helping others. After three years, one of his teachers told him that he would have more impact on the world if he left the monk's path to share his experience and wisdom with others. Heavily in debt, and with no recognizable skills on his résumé, he moved back home in north London with his parents. Shetty reconnected with old school friends—many working for some of the world's largest corporations—who were experiencing tremendous

stress, pressure, and unhappiness, and they invited Shetty to coach them on well-being, purpose, and mindfulness. Since then, Shetty has become one of the world's most popular influencers. In 2017, he was named in the Forbes magazine 30-under-30 for being a game-changer in the world of media. In 2018, he had the #1 video on Facebook with over 360 million views. His social media following totals over 38 million, he has produced over 400 viral videos which have amassed more than 8 billion views, and his podcast, On Purpose, is consistently ranked the world's #1 Health and Wellness podcast. In this inspiring, empowering book, Shetty draws on his time as a monk to show us how we can clear the

roadblocks to our potential and power. Combining ancient wisdom and his own rich experiences in the ashram, Think Like a Monk reveals how to overcome negative thoughts and habits, and access the calm and purpose that lie within all of us. He transforms abstract lessons into advice and exercises we can all apply to reduce stress, improve relationships, and give the gifts we find in ourselves to the world. Shetty proves that everyone can—and should—think like a monk.

Famed for creating some of the most iconic images in European art - including Mona Lisa and The Last Supper - Leonardo da Vinci has influenced generations of artists and thinkers, and continues to do so after more than 500 years. While we cannot hope to emulate his achievements, da Vinci showed an attitude towards life from which we can all learn. A true polymath, he was also a sculptor, architect, musician, mathematician, engineer and an anatomist

Combining these strengths with a unique imagination, da Vinci came up with designs for inventions centuries ahead of their time. Explore how entrepreneurial thinking can dramatically

improve your work, life and relationships Having the drive, ambition and inspiration to start a new business takes a special mind-set and self-confidence—think Steve Jobs, Elon Musk, Mark Zuckerberg. It's no wonder that we regard successful entrepreneurs as modern-day magicians, transforming sometimes-radical ideas into global brands that change the way we live our lives. But what if that spirit and drive were applied to the world outside of business start-ups? An entrepreneur seeks to build something from nothing, to take an inspired idea and make it a reality. In *How to Think Like an Entrepreneur*, Philip Delves Broughton will explore what it takes to be a successful entrepreneur—the ability to disrupt the

social, economic, and environmental crises of our time spring from just four constant and predictable forces Reveals the three dramatic disruptions on the horizon that should be a part of every strategic conversation Written by Cecily Sommers the Founder and President of The Push Institute, a non-profit think tank that tracks significant global trends and their implications for business, government, and non-profit. Filled with tools and models for a new world, this book should be required reading for strategists and innovators across disciplines. "Refreshing. A book that does not follow today's push to be 'innovative' just to snag attention because of the current hot trending keyword. Matter of fact, Cecily Sommers' book works

to get us away from simply identifying and going for a ride on the latest trend(s) in our respective industries. Quite the contrary, rather than avoid a scientific or tactical discussion of trend identification, she works to give us the ability to go beyond trends and into the future. Cecily has drafted a book providing a nice blend of practical reality, philosophy, and practical execution. It speaks well to current discussions about how to drive 'innovation' or, better, creativity within your businesses—however large or small. All in, this is a book 254 pages long, including index, that is written at a practical level that, after closer study following an initial read-through, provides a methodology for anticipating the future and taking action to meet it.

A former rocket scientist reveals the habits, ideas, and strategies that will empower you to turn the seemingly impossible into the possible. Rocket science is often celebrated as the ultimate triumph of technology. But it's not. Rather, it's the apex of a certain thought process -- a way to imagine the unimaginable and solve the unsolvable. It's the same thought process that enabled Neil Armstrong to take his giant leap for mankind, that allows spacecraft to travel millions of miles through outer space and land on a precise spot, and that brings us closer to colonizing other planets. Fortunately, you don't have to be a rocket scientist to

In this accessible and practical book, Ozan Varol reveals nine simple strategies from rocket science that you can use to make your own giant leaps in work and life -- whether it's landing your dream job, accelerating your business, learning a new skill, or creating the next breakthrough product. Today, thinking like a rocket scientist is a necessity. We all encounter complex and unfamiliar problems in our lives.
