In the 14th edition, the authors have focused on the concept of inquiry and a student's inherent desire to learn. To do this, they integrated a tested, traditional learning system with modern digital and pedagogical approaches designed to stimulate and engage today's student.

Inquiry into Life was originally developed to reach out to science-shy students. The text now represents one of the cornerstones of introductory biology education and was founded on the belief that teaching science from a human perspective, coupled with human applications, makes the material more relevant to the student. As scientists and educators, the authors are aware that scientific discovery is a dynamic process and the advances in digital publishing are allowing authors to update content on a regular basis.

Encounters in Planning Thought builds on the intellectual legacy of spatial planning through essays by leading scholars from around the world, including John Friedmann, Peter Marcuse, Patsy Healey, Andreas Faludi, Judith Innes, Rachelle Alterman and many more. Each author provides a fascinating and inspiring unravelling of his or her own intellectual journey in the context of events, political and economic forces, and prevailing ideas and practices, as well as their own personal lives. This is crucial reading for those interested in spatial planning, including those studying the theory and history of spatial planning. Encounters in Planning Thought sets out a comprehensive, intellectual, institutional and practical agenda for the discipline of spatial planning as it heads towards its next half-century. Together, the essays form a solid base on which to understand the most salient elements to be taken forward by current and future generations of spatial planners.
