It provides a general introduction to film literacy and explains the rationale, methods, and objectives of working with feature films. In addition, the book contains in-depth considerations on sixteen selected films, which are grouped regionally (Australia, New Zealand, South Africa, USA, Great Britain). Each chapter describes the topical focus of the film and its central theme and provides background information on social, historical, political, and

geographical issues. A profound analysis of selected scenes lays the foundation for considerations on the teaching potential of the film. In a download section, the chapters are complemented with ready-to-use teaching materials on film-specific aspects (narrative, dramatic and cinematographic dimensions), which are organised as pre-/while-/post-viewing activities. A glossary on technical terms for film analysis completes the volume.

by prejudice in South Africa and healed by love.

To take Africa from the edge to the centre of the global economy, it is critical to engage African voices in policy discussions on the global political economy. With Africa's projected economic importance in the future and South Africa's prominent role in the G-20 and BRICS, it is vital that this part of the world is involved in restructuring the rules and principles of international economic law. This book examines themes dealing with cross border trade, investment, development and finance issues.

Cuba's former counterintelligence chief reviews more than 600 CIA plots to assassinate Fidel Castro - a project code-named Executive Action. Although melodramatic and at times almost comical, the plans were both drawn up in deadly earnest and entirely unconstitutional, as subsequent US government enquiries concluded, including the 1975 Commission headed by Senator Frank Church.

ISO 5349, developed by ISO Technical Committee ISO/TC 108, "Mechanical vibration and shock", is the generic standard for the measurement and assessment of human vibration exposure. Ever since it was originally published in 1986, this standard has been unclear in its assessment of

repeated isolated shocks. The current version of ISO 5349-1:2001 states in its scope that the time dependency for human response to repeated shocks is not fully known. Caution is therefore advised in the application of this part of ISO 5349 to such vibration (isolated shocks). In response to an initiative on the part of the ISO/TC 108 Technical Committee, a workshop was held at the 13th International Conference on Hand-Arm Vibration in Beijing in 2015 for the purpose of determining the current state of knowledge concerning exposure to repeated isolated shock vibration caused by machinery and tools and its pathophysiological and epidemiological assessment, and evaluating gaps in knowledge in the interests of future research activity. This report contains the papers presented at the workshop. Part I provides an overview of the results of the workshop and of details of two papers. Part II contains a research report containing background information on two further papers presented at the workshop.

There is plenty to explore, as

long as Tanya stays away from Hangman's Wood- a vast stretch of forest, full of catacombs and notorious for people losing their lives. Fifty years ago a girl vanished in the woods, a girl Tanya's grandmother will not speak of. As Tanya learns more about this girl, she finds herself dangerously close to vanishing into the fairy realm forever. Debut author Michelle Harrison weaves an intricate mystery into a beautiful and haunting fantasy that captures a rich world of fairy lore where only the color red can offer protection.
