A trader decides at the last minute that he can wait until Monday to liquidate his huge grain position. Torrential rains follow---the decision costs him two million dollars. A company head conducts business in Europe, unaware that back home, an underling has gone crazy with his money in the bond pit. The official's loss--\$1.25 million. Three traders in different parts of the country get blindsided in the same stock takeover. They all lose despite the fact that one of them is positioned opposite the other two. When *Supertraders Meet Kryptonite* recounts it all--the ups, the downs--the rebounds. Learning from the losses of others is, perhaps, the most instructive learning experience. Until this book, there was no work dealing exclusively with losses and how to cope with them. Thirty-five brave, forthright and articulate traders address this subject headon. The result is a must-read for anyone who has ever put on a position and wondered, My God, what do I do now? Interviews with: Bill Beach, Steve L. Miller, Walter Bressert, Tony Saliba, Teresa Lo, Larry Rosenberg, Charlie Wright, Merton Feldstein, Howard Malman, Adrienne Laris Toghraie, Pat Arbor, Mark Cook, Linda Bradford Raschke, Joe DiNapoli, Jack Kota, Lawrence G. Henriksson, Chief Investment Officer, Advanced Portfolio Management "Quants"--those who design and implement mathematical models for the pricing of derivatives, assessment of risk, or prediction of market movements--are the backbone of today's investment industry. As the greater volatility of current financial markets has driven investors to seek shelter from increasing uncertainty, the quant revolution has given people the opportunity to avoid unwanted financial risk by literally trading it away, or more specifically, paying someone else to take on the unwanted risk. How I Became a Quant reveals the faces behind the quant revolution, offering you the chance to learn firsthand what it's like to be a quant today. In this fascinating collection of Wall Street war stories, more than two dozen quants detail their roots, roles, and contributions, explaining what they do and how they do it, as well as outlining the sometimes unexpected paths they have followed from the halls of academia to the front lines of an investment revolution.
